Concept

ELEVATOR PITCH

Pawfect Match matches pets in need of a new home with their forever family.

It's for you if:

You can no longer care for your pet

or

You want a new pet and are looking to adopt.

Our motivation

Give a pet a second chance:
save lives by reducing the number of animals living (and being euthanised) in shelters.

Help people access the **psychological, emotional and physical benefits** of having a pet that matches them perfectly.

Help people **save money** on the upfront costs of getting a pet (eg. adopted pets are already vaccinated, microchipped).

Our user story

AS A pet owner whose circumstances have changed

I WANT a platform where I can post an ad for my pet

SO THAT I can choose the perfect person to adopt my pet.

Process

Tools and tech

To create Pawfect Match, we used the following packages and technologies:

- HTML
- CSS
- Bootstrap
- Javascript
- Node.js
- Express.js
- MySQL2
- Sequelize
- Express-handlebars
- Express-session
- Connect-session-sequelize
- Nodemailer
- Dotenv
- Bcrypt
- Base64
- Github
- VS Code
- Heroku

Role breakdown

- **Project idea** – Chujun
- **Project set-up** - Hayley and Vanessa
- **Branding** – Andrea
- **Models** – Wendy
- **Views** (handlebars) – Vanessa, Wendy and Chujun
- **Views** (styling) – Hayley and Andrea
- **Controllers** – Chujun
- **Alternative tech** (nodemailer) – Vanessa
- **Presentation** – Hayley

CHALLENGES

Email notifications using nodemailer

SUCCESES

Formatting using Prettier

Email notifications using nodemailer

Quickly chose idea and began executing

Future directions

Directions For Future Development

- **Private messaging** between current and potential owners
- Make **appointments** to meet
- Suggested **profile matching** for pets needing adoption and people wanting to adopt
- “**Police check**” for history of potential new owners
- Promote **community relationships**, eg. meet-ups for people with pets

The logo features a brown paw print icon above the words "pawfect Match". The word "pawfect" is written in a lowercase, cursive, brown font, while "Match" is in a larger, bold, brown sans-serif font.
